

Lesson Plan for Hydraulics

(Semester-4th)

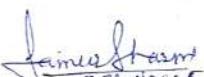

Session: (January-June 2026)

| S.No. | MONTH | WEEK   | Date        | CONTENTS  | REMARKS      |
|-------|-------|--------|-------------|---|--------------|
| 1     | Jan   | Week 5 | 27,28,30    | Introduction, Overview of syllabus, Evaluation scheme, <b>Pressure measurement and Hydrostatic pressure</b> : Technical terms used in Hydraulics –fluid, fluid mechanics, hydraulics, hydrostatics, and hydrodynamics - ideal and real fluid, application of hydraulics.  |              |
| 2     | Feb   | Week 1 | 2,3,4,6     | Physical properties of fluid – density-specific volume, specific gravity, surface tension, capillarity, and viscosity-Newton's law of viscosity. Various types of pressure – Atmospheric Pressure, Gauge Pressure, Absolute Pressure, Vacuum Pressure. Concept of Pressure head and its unit, Pascal's law of fluid pressure and its uses.  |              |
|       |       | Week 2 | 9,10,11,13  | Measurement of differential Pressure by different methods, Numerical Practice   |              |
|       |       | Week 3 | 16,17,18,20 | Variation of pressure with depth, Pressure diagram, hydrostatic pressure and center of pressure on immersed surfaces and on tank walls. Determination of total pressure and center of pressure on sides and bottom of water tanks, sides and bottom of tanks containing two liquids, vertical surface in contact with liquid on either side |              |
|       |       | Week 4 | 23,24,25,27 | Numerical Practice, <b>Fluid Flow Parameters</b> : Types of flow – Gravity and pressure flow, Laminar, Turbulent, Uniform, Non-uniform, Steady, Unsteady flow. Reynolds number  |              |
| 3     | Mar   | Week 1 | 2,3,6       | Discharge and its unit, continuity equation of flow, Energy of flowing liquid: potential, kinetic and pressure energy   |              |
|       |       | Week 2 | 9,10,11,13  | Bernoulli's theorem: statement, assumptions, equation. Numerical practice   | Class Test-I |
|       |       | Week 3 | 16,17,18,20 | <b>Flow through pipes</b> : Major Head loss in pipe: Frictional loss and its computation by Darcy's Welsbach equation, Minor losses in pipe: loss at entrance, exit, sudden contraction, sudden enlargement, and fittings.  |              |
|       |       | Week 4 | 23,24,25,27 | Flow through pipes in series, pipes in parallel and Dupuit's equation for equivalent pipe, Hydraulic gradient line and total energy line, Numerical Practice  |              |

*Janu Sharma*

*DR*

| S.No. | MONTH | WEEK   | Date        | CONTENTS  | REMARKS       |
|-------|-------|--------|-------------|---|---------------|
|       |       | Week 5 | 30,31       | Flow through Open Channel : Geometrical properties of channel section: Wetted area, wetted perimeter, hydraulic radius for rectangular and trapezoidal channel section. |               |
| 4     | April | Week 1 | 1           | Determination of discharge by Chezy's equation and Manning's equation.  | Class Test-II |
|       |       | Week 2 | 6,7,8,10    | Conditions for most economical rectangular and trapezoidal channel section, Discharge measuring devices: Triangular and rectangular Notches.                            |               |
|       |       | Week 3 | 13,17       | Velocity measurement devices: current meter, floats and Pitot's tube,   |               |
|       |       | Week 4 | 20,21,22,24 | Specific energy diagram, Froude's Number, Numerical Practice  |               |
|       |       | Week 5 | 27,28,29    | <b>Hydraulic Pumps:</b> Concept of pump, Types of pumps - centrifugal<br><b>HOUSE TEST</b>  |               |
| 5     | May   | Week 2 | 4,5,6,8     | Rreciprocating, submersible pump. Suction head, delivery head, static head, Manometric head   |               |
|       |       | Week 3 | 11,12,13,15 | Selection and choice of pump,   |               |
|       |       | Week 4 | 18,19,20,22 | Revision  |               |
|       |       | Week 5 | 25,26       |   |               |
|       |       |        |             |   |               |

**Lesson Plan for Advanced Surveying (Semester-4th ) Session: (Jan-May) 2026**

| S. No. | MONTH    | WEEK   | Date     | CONTENTS  | REMARKS      |
|--------|----------|--------|----------|---|--------------|
| 1      | January  | Week 5 | 29,30,31 | Principles of plane table survey. Accessories of plane table and their use, Telescopic alidade.   |              |
| 2      | February | Week 1 | 5,6,7    | Setting of plane table; Orientation of plane table - Back sighting and Magnetic meridian method. Methods of plane table surveys- Radiation, Intersection and Traversing                         |              |
|        |          | Week 2 | 12,13    | Merits and demerits of plane table survey. Theodolite Surveying, Types and uses of Theodolite, Components of transit Theodolite and their functions, Reading the Vernier of transit Theodolite. |              |
|        |          | Week 3 | 19,20,21 | Technical terms- Swinging, Transiting, Face left, Face right. Fundamental axes of transit Theodolite and their relationship   |              |
|        |          | Week 4 | 26,27,28 | Temporary adjustment of transit Theodolite. Measurement of horizontal angle- Direct and Repetition method, Errors eliminated by method of repetition  |              |
| 3      | March    | Week 1 | 5,6,7    | Measurement of horizontal angle- Direct and Repetition method, Errors eliminated by method of repetition. Measurement of magnetic bearing   |              |
|        |          | Week 2 | 12,13    | Theodolite traversing by included angle method and Deflection angle method. Traverse Computation-Latitude, Departure, Consecutive coordinates, independent coordinates.                         | Class Test-I |
|        |          | Week 3 | 19,20,21 | Principles of Tacheometry, Tacheometer, and its component parts, Anallatic lens. Tacheometric formula for horizontal distance with telescope horizontal and staff vertical                      |              |
|        |          | Week 4 | 27,28    | Field method for determining constants of tacheometer, determining horizontal and vertical distances with tacheometer by fixed hair method and staff held vertical, Limitations of tacheometry  |              |
| 4      | April    | Week 1 | 2,4      | Types of curves used in roads. Designation of curves. Setting simple circular curve by offsets from long chord and  |              |
|        |          | Week 2 | 9,10     | Rankine's method of deflection angles.  | Class Test-I |
|        |          | Week 3 | 16,17,18 | Principle of Electronic Distance Meter (EDM), its component parts and their Functions, use of EDM.  |              |

|   |     |        |          |   |  |
|---|-----|--------|----------|---|--|
|   |     | Week 4 | 23,24,25 | Use of micro-optic Theodolite and Electronic Digital Theodolite. Use of Total Station, Use of function keys.                                      |  |
|   |     | Week 5 | 30       | Remote sensing, GPS and GIS, Remote Sensing – Overview,   |  |
| 5 | May | Week 1 | 2        | Remote sensing system   |  |
|   |     | Week 2 | 7,8      | <b>House Test</b>   |  |
|   |     | Week 3 | 14,15,16 | Use of Global Positioning System (G.P.S.) instruments. Geographic Information System (GIS): Overview, Components, Applications, Software for GIS. |  |
|   |     | Week 4 | 21,22,23 | Overview, Components, Applications, Software for GIS. Introduction to Drone Surveying.  |  |
|   |     |        |          |   |  |

| Sr.No. | MONTH    | WEEK   | Date | CONTENTS  | REMARKS      |
|--------|----------|--------|------|---|--------------|
| 1      | January  | Week 5 | 28   | Conventions as per IS 962, symbols for different materials such as earthwork, brickwork, stonework, concrete, woodwork, and glass.  |              |
| 2      | February | Week 1 | 4    | Graphical symbols for doors and windows, Abbreviations, symbols for sanitary and electrical installations.  |              |
|        |          | Week 2 | 11   | Types of lines-visible lines, centre line, hidden line, section line, dimension line, extension line, pointers,   |              |
|        |          | Week 3 | 18   | arrowhead, or dots. Appropriate size of lettering and numerals for titles, sub-titles, notes, and dimensions. Types of scale- Monumental, Intimate, criteria for Proper Selection of scale for various types of drawing. Sizes of various standard papers/sheets.   |              |
|        |          | Week 4 | 25   | Sizes of various standard papers/sheets. Reading and interpreting readymade Architectural building drawing (To be procured from Architect, Planning Consultants, Planning Engineer). Unit- II Planning of Building Principles of planning for Residential and Public building- Aspect, Prospect, Orientation, Grouping, Privacy, Elegance, Flexibility, Circulation, Furniture requirements, Sanitation, Economy. Space requirement and norms for minimum dimension of different units in the residential and public buildings as per IS 962. |              |
| 3      | March    | Week 2 | 11   | Rules and byelaws of sanctioning authorities for construction work. Plot area built up area, super built-up area, plinth area, carpet area, floor area and FAR (Floor Area Ratio). Line plans for residential building of minimum three rooms including water closet (WC), bath and staircase as per principles of planning. Line plans for public building-school building, primary health centre, restaurant, bank, post office, hostel, Function Hall and Library.   | Class test-I |
|        |          | Week 3 | 18   | Drawing of Single storey Load Bearing residential building (2 BHK) with staircase. Data drawing –plan, elevation, section, site plan, schedule of openings, construction notes with specifications, area statement, Planning and design of staircase- Rise and Tread for residential and public building.   |              |
|        |          | Week 4 | 25   | Working drawing – developed plan, elevation, section passing through staircase or WC and bath. Foundation plan of Load bearing structure.   |              |
| 4      | April    | Week 1 | 1    | Drawing of Two storeyed Framed Structure (G+1), residential building (2 BHK) with staircase. Data drawing – developed plan, elevation, section, site plan, schedule of openings, construction notes with specifications, area statement. Planning and design of staircase- Rise and Tread for residential and public building.  |              |
|        |          | Week 2 | 8    | Working drawing of Framed Structure – developed plan, elevation, section passing through staircase or WC and bath. Foundation plan of Framed Structure  | Class Test-I |
|        |          | Week 4 | 22   | Details of RCC footing, Column, Beam, Chajjas,  |              |
|        |          | Week 5 | 29   | Details of Lintel, Staircase, and slab.   |              |
|        |          | Week 2 | 6    | House Test  |              |

|   |     |        |    |   |  |
|---|-----|--------|----|---|--|
| 5 | May | Week 3 | 13 | Drawing with CAD- Draw commands, modify commands, layer commands. |  |
|   |     | Week 4 | 20 | Revision  |  |

| Lesson Plan for Transportation Engineering (Semester: 4th) Session: (Jan-May, 2026) |       |        |          |   |  |               |
|---|-------|--------|----------|---|--|---------------|
| S.No  | MONTH | WEEK   | Date     | CONTENTS  |  | REMARKS       |
| 1   | Jan   | Week 5 | 27, 29   | Unit – 1 Overview of Highway Engineering , Role of transportation in the development of nation, Scope and Importance of roads in India and its Characteristics.   |  |               |
| 2   | Feb   | Week 1 | 2,3,5    | Different modes of transportation – land way, waterway, airway. Merits and demerits of roadway and railway.General classification of roads. Selection and factors affecting road alignment.<br><b>Unit- 2 Geometric Design of Highway</b> Camber: Definition, purpose, types as per IRC – recommendations.Kerbs: Road margin, road formation, right of way. |  |               |
|   |       | Week 2 | 9,10,12  | Design speed and various factors affecting design speed as per IRC –recommendations. Gradient: Definition, types as per IRC – Recommendations. Sight distance (SSD): Definition, types IRC – recommendations, simple numerical. Sight distance (SSD): Definition, types IRC – recommendations, simple numerical.  |  |               |
|   |       | Week 3 | 16,17,19 | Curves: Necessity, types: Horizontal, vertical curves.Super elevation: Definition, formula for calculating minimum and maximum Super elevation and method of providing super-elevation. Standards cross-sections of national highway in embankment and cutting.   |  |               |
|   |       | Week 4 | 23,24,26 | <b>Unit- 3 Construction of Road Pavements</b><br>Types of road materials and their Tests – Test on aggregates- Flakiness and Elongation Index tests, Angularity Number test, test on Bitumen- penetration,  |  |               |
| 3   | March | Week 1 | 2,3,5    | Ductility, Flash and Fire point test and Softening point test. Pavement – Definition, Types Structural Components of pavement and their functions Construction of WBM road. Merits and demerits of WBM & WMM road.  |  |               |
|   |       | Week 2 | 9,10,12  | Construction of Flexible pavement / Bituminous Road, Types of Bitumen and its proper- ties, Emulsion,Cutback, Tar, Terms used in BR-prime coat, tack coat, seal coat, Merits and Demerits of BR.  |  | Class Test -1 |
|   |       | Week 3 | 16,17,19 | Cement concrete road methods of construction, Alternate and Continuous Bay Method, Construction joints, filler and sealers, merits and demerits of concrete roads. Types of joints.   |  |               |
|   |       | Week 4 | 23,24    | <b>Unit- 4 Basics of Railway Engineering Classification of Indian Railways</b> , zones of Indian Railways. Permanent way: Ideal requirement, Components; Rail Gauge, types, factors affecting selection of a gauge.   |  |               |
|   |       | Week 5 | 30,31    | Rail, Rail Joints - requirements, types.Creep of rail causes and prevention.<br><b>Track geometrics, Construction and Maintenance</b> - Factors governing rail alignment.   |  | Unit-5        |
| 4   | April | Week 1 | 2        | Track Cross sections – standard cross section of single and double line in cutting and embankment. Important terms- permanent land, formation width, side drains,   |  |               |

# Department of Civil Engineering

|   |       |        |          |  |               |
|---|-------|--------|----------|--|---------------|
| 4 | April | Week 2 | 6,7,9    | Railway Track Geometrics: Gradient, curves- types and factors affecting, grade compensation, super elevation, limits of Super elevation on curves, cant deficiency, negative cant, coning of wheel, tilting of rail. | Class Test -2 |
|   |       | Week 3 | 13,16    | Branching of Tracks, Points and crossings, Turn out- types, components, functions and inspection. Track junctions: crossovers, scissor cross over, diamond crossing, track triangle.                                 |               |
|   |       | Week 4 | 20,21,23 | Station -PurposeRequirement of railway station, important technical terms, types of rail- way station, factors affecting site selection for railway station  |               |
|   |       | Week 5 | 27,28,30 | Station yard: Classification- Passenger, goods, locomotive and marshalling yards. Function & drawbacks of marshalling yards. Track Maintenance- Necessity, Classification,   |               |
| 5 | May   | Week 2 | 4,5,7    | <b>House Test</b>  |               |
|   |       | Week 3 | 11,12,14 | Tools required for track maintenance with their functions, Organization of track maintenanceDuties of permanent way inspector, gang mate and Key man.  |               |
|   |       | Week 4 | 18,19,21 | Revision   |               |
|   |       | Week 5 | 25,26    | Revision   |               |

## Lesson Plan for Construction Management (Semester: 4th) Session: (Jan-May, 2026)

| S.No | MONTH | WEEK   | Date     | CONTENTS   | REMARKS       |
|------|-------|--------|----------|--|---------------|
| 1    | Jan   | Week 5 | 27,31    | <b>Unit - I Construction industry and management</b><br>Organization-objectives, principles of organization, types of organization:<br>government/public and private construction industry, Role of various personnel in construction organization Agencies associated with construction work- owner |               |
| 2    | Feb   | Week 1 | 2,3,7    | government/public and private construction industry, Role of various personnel in construction organization Agencies associated with construction work- owner  |               |
|      |       | Week 2 | 9,10     | promoter, builder, designer, architects. Role of consultant for various activities: Preparation of Detailed Project Report (DPR), Monitoring of progress and quality, settlement of disputes   |               |
|      |       | Week 3 | 16,17,21 | <b>Unit - II Site Layout</b> Principles governing site layout. Factors affecting site layout   |               |
|      |       | Week 4 | 23,24,28 | Preparation of site layout. Land acquisition procedures and providing compensation   |               |
| 3    | March | Week 1 | 2,3,7    | <b>Unit- III Planning and scheduling</b> Identifying broad activities in construction work & allotting time to it, Methods of SchedulingDevelopment of bar charts, Merits & limitations of bar chart.  |               |
|      |       | Week 2 | 9,10     | Elements of Network: Event, activity, dummy activities, Precautions in drawing Network. Numbering the events.CPM networks, activity time estimate,   | Class test 1  |
|      |       | Week 3 | 16,17    | Event Times by forward & backward pass calculation, start and finish time of activity, project duration  |               |
|      |       | Week 4 | 23,24,28 | Floats: Types of Floats-Free, independent, and total floats,critical activities and critical path,Purpose of crashing a network, Normal Time and Cost, Crash Time and Cost, Cost slope   |               |
|      |       | Week 5 | 30,31    | Optimization of cost and duration.Material Management- Ordering cost, inventory carrying cost,   |               |
| 4    | April | Week 1 | 4        | Economic Order Quantity Store management   |               |
|      |       | Week 2 | 6,7      | various records related to store management, inventory control by ABC technique,Introduction to material procurement through portals (e.g. <a href="http://www.inampro.nic.in">www.inampro.nic.in</a> )  | Class test -2 |
|      |       | Week 3 | 13,18    | <b>Unit IV Construction Contracts and Specifications</b> Types of Construction contracts   |               |
|      |       | Week 4 | 20,21,25 | Contract documents, specifications, general special conditions   |               |
|      |       | Week 5 | 27,28    | Contract Management, procedures involved in arbitration and settlement (Introduction only)   |               |
| 5    | May   | week 1 | 2        | <b>Unit- V Safety in Construction</b> Safety in Construction Industry—Causes of Accidents, Remedial and Preventive Measures  |               |
|      |       | Week 2 | 4,5      | <b>House Test</b>  |               |
|      |       | Week 3 | 11,12,16 | Labour Laws and Acts pertaining to Civil construction activities (Introduction only)   |               |
|      |       | Week 4 | 18,19,23 | Revision   |               |
|      |       | Week 5 | 25,26    | Revision   |               |

Signature of H.O.D  
(Dr. Lalit Goel)

| S.No. | MONTH | WEEK   | DATE     | CONTENTS   | REMARKS       |
|-------|-------|--------|----------|--|---------------|
| 1     | Jan   | Week 5 | 27 & 28  | <b>PART-1: RAILWAYS</b> Introduction to Indian Railways, Railways surveys: Factors influencing the railways route.   |               |
| 2     | Feb   | Week 1 | 2,3 & 4  | Railways surveys: Factors influencing the railways route, brief description of various types of railway survey   |               |
|       |       | Week 2 | 9,10,11  | Classification of permanent way describing its component part Rail Gauge: Definition, types, practice in India   |               |
|       |       | Week 3 | 16,17,18 | Rail – types of rails Rail Fastening: Rail joints, types of rail joints, Fish plates, spikes bearing plates Sleepers: Functions of sleepers, types of sleepers, requirements of an ideal material of Sleepers. |               |
|       |       | Week 4 | 23,24,25 | Ballast: Function of ballast, requirements of an ideal material of ballast Crossing and signalling: Brief description regarding different types of crossing/signalling   |               |
|       |       | Week 1 | 2,3      | Maintenance of track: Necessity, track fixtures;   |               |
| 3     | Mar   | Week 2 | 9,10,11  | maintenance and boxing of ballast, maintenance gauges, toolsDrains, methods of construction.   | Class Test-I  |
|       |       | Week 3 | 16,17,18 | <b>PART-II: BRIDGES</b> Introduction, Bridge–its function and component parts, difference between a bridge and A culvert   |               |
|       |       | Week 4 | 23,24,25 | Classification of Bridges Their structural elements and suitability:According to life-permanent and temporary, According to deck level–Deck, through and semi-through  |               |
|       |       | Week 5 | 30,31    | According to material–timber, masonry, steel, RCC, pre-stressed IRC classification   |               |
|       |       | Week 1 | 1        | Bridge Foundations: Introduction to open foundation pile foundation  |               |
| 4     | April | Week 2 | 6,7,8    | Well foundation Piers, Abutments and Wing walls  | Class Test-II |
|       |       | Week 3 | 13,      | Piers–definition, parts; types–solid (masonry and RCC), open Abutment sand wing walls–definition,  |               |
|       |       | Week 4 | 20,21,22 | Types of abutment (straight and tee), abutment with wing walls 47 (straight, splayed, return and curved).Bridge bearings Purpose of bearing, types of bearing–fixed plate, rocker and roller,                  |               |
|       |       | Week 5 | 27,28,29 | Maintenance of Bridges , inspection of bridges , Routine maintenance   |               |
|       |       | Week 2 | 4,5,6    | <b>House Test</b>  |               |
| 5     | May   | Week 3 | 11,12,13 | <b>PART-III: TUNNELS:-</b> Definition and necessity of tunnels, Typical section of tunnels for a national highway and single and double broad gauge railway track.   |               |
|       |       | Week 4 | 18,19,20 | double broad gauge railway track. Ventilation-necessity and methods of ventilation, by blowing, exhaust and combination of blowing and exhaust   |               |
|       |       | Week 5 | 25,26    | Drainage method of draining water in tunnels Lighting in tunnels & lining of tunnels.  |               |

Session: (January-June 2026)

| S.No. | MONTH    | WEEK   | Group | Date | CONTENTS  | REMARKS |
|-------|----------|--------|-------|------|---|---------|
| 1     | January  | Week 5 | 1     | 30   | Introduction, Syllabus Overview, Evaluation scheme  |         |
|       |          |        | 2     | 31   | Introduction, Syllabus Overview, Evaluation scheme, Use piezometer to measure pressure at a given point.  |         |
| 2     | February | Week 1 | 1     | 6    | Use piezometer to measure pressure at a given point.  |         |
|       |          |        | 2     | 7    | Use U tube differential manometer to measure pressure difference between two given points   |         |
|       |          | Week 2 | 1     | 13   | Use U tube differential manometer to measure pressure difference between two given points   |         |
|       |          | Week 3 | 1     | 20   | Find the resultant pressure and its position for given situation of liquid in a tank.   |         |
|       |          |        | 2     | 21   | Find the resultant pressure and its position for given situation of liquid in a tank.   |         |
|       |          | Week 4 | 1     | 27   | Use Reynold's apparatus to determine type of flow.  |         |
|       |          |        | 2     | 28   | Use Reynold's apparatus to determine type of flow.  |         |
| 3     | March    | Week 1 | 1     | 6    | Use Bernoulli's apparatus to apply Bernoulli's theorem to get total energy line for a flow in a closed conduit of varying cross sections.               |         |
|       |          |        | 2     | 7    | Use Bernoulli's apparatus to apply Bernoulli's theorem to get total energy line for a flow in a closed conduit of varying cross sections.               |         |
|       |          | Week 2 | 1     | 13   | Determine minor losses in pipe fittings due to sudden contraction and sudden enlargement. Determine minor losses in pipe fitting due to Bend and Elbow. |         |
|       |          | Week 3 | 1     | 20   | Calibrate Venturimeter to find out the discharge in a pipe.   |         |
|       |          | Week 4 | 1     | 27   | Calibrate the Orifice to find out the discharge through a tank  |         |
|       |          |        | 2     | 28   | Determine minor losses in pipe fittings due to sudden contraction and sudden enlargement.   |         |
| 4     | April    | Week 1 | 2     | 4    | Determine minor losses in pipe fitting due to Bend and Elbow.   |         |
|       |          | Week 2 | 1     | 10   | Use Current meter to measure the velocity of flow of water in open channel.   |         |
|       |          | Week 3 | 1     | 17   | Use Current meter to measure the velocity of flow of water in open channel.   |         |
|       |          |        | 2     | 18   | Calibrate Venturimeter to find out the discharge in a pipe.   |         |

Lesson Plan for Advanced Surveying Lab G-I (Semester-4th) Session: (Jan-May) 2026

| S. No. | MONTH    | WEEK   | Date  | CONTENTS  | REMARKS |
|--------|----------|--------|-------|---|---------|
| 1      | January  | Week 5 | 31    | Use plane table survey to prepare plans of a plot of seven-sided closed traverse by Radiation Method.                   |         |
| 2      | February | Week 1 | 2,7   | Use plane table survey to prepare plans, locate details by Intersection Method.   |         |
|        |          | Week 2 | 9     | Use plane table survey to prepare plans, locate details by Traversing Method.   |         |
|        |          | Week 3 | 16,21 | Use plane table survey to carry out Survey Project for closed traverse for minimum five sides around a building.        |         |
|        |          | Week 4 | 23,28 | Use transit theodolite to measure Horizontal and Vertical angle by Direct Method.                                       |         |
| 3      | March    | Week 1 | 2,7   | Plot the traverse on A1 size imperial drawing sheet for the collected data from preceding Theodolite Survey Project.    |         |
|        |          | Week 2 | 9     | Use Theodolite as a Tacheometer to compute reduced levels and horizontal distances.                                     |         |
|        |          | Week 3 | 16    | Set out a circular curve by Rankine's Method of Deflection Angles   |         |
|        |          | Week 4 | 23,28 | Use micro-optic Theodolite to Measure Horizontal angle by Direct Method.  |         |
|        |          | Week 5 | 30    | Checking of Files and Viva  |         |
| 4      | April    | Week 1 | 4     | Use EDM to measure horizontal distance.   |         |
|        |          | Week 2 | 6     | Use Total station instrument to measure horizontal distances.   |         |
|        |          | Week 3 | 13,18 | Use Total station instrument to measure vertical angle  |         |
|        |          | Week 4 | 20,25 | Use Total station instrument to carry out Survey Project for closed traverse for minimum five sides.                    |         |
|        |          | Week 5 | 27    | Plot the traverse on A1 size imperial drawing sheet for the collected data from preceding Total Station Survey Project. |         |
| 5      | May      | Week 1 | 2     | Use GPS to locate the coordinates of a station  |         |
|        |          | Week 2 | 4     | <b>House Test</b>   |         |
|        |          | Week 3 | 11,16 | Reperform   |         |
|        |          | Week 4 | 18,23 | Reperform   |         |
|        |          | Week 5 | 25    | Reperform   |         |

| S.N | MONTH    | WEEK   | Date  | CONTENTS  | REMARKS |
|-----|----------|--------|-------|---|---------|
| 1   | January  | Week 5 | 28,31 | Draw various types of lines, graphical symbols for materials, doors and windows, symbols for sanitary, water supply and electrical installations and write abbreviations as per IS 962. |         |
| 2   | February | Week 1 | 4,7   | Draw line plan to suitable scale (1BHK, staircase, WC and Bathroom)   |         |
|     |          | Week 2 | 11    | Draw submission drawing to the scale 1:100 of a single storey load bearing residential building (2BHK) with flat Roof and staircase showing   |         |
|     |          | Week 3 | 18,21 | a. Developed plan and elevation, b. Section passing through Stair or W.C. and Bath  |         |
|     |          | Week 4 | 25,28 | c. Foundation plan and schedule of openings.<br>d. Site plan (1:200), area statement, construction notes.   |         |
| 3   | March    | Week 1 | 7     | Draw submission drawing, to the scale of 1:100, of (G+1) Framed Structure Residential Building (2BHK) with Flat Roof and staircase: a. Developed plan                                   |         |
|     |          | Week 2 | 11    | Draw submission drawing, to the scale of 1:100, of (G+1) Framed Structure Residential Building (2BHK) with Flat Roof and staircase showing:<br>b. Elevation.                            |         |
|     |          | Week 3 | 18    | c. Section passing through Staircase, WC and Bath<br>d. Site plan (1:200) and area statement  |         |
|     |          | Week 4 | 25,28 | e. Schedule of openings and Construction Notes.   |         |
| 4   | April    | Week 1 | 1,4   | Draw working drawing for above mentioned drawing at serial number 5 showing:<br>a. Foundation plan to the scale 1:50  |         |
|     |          | Week 2 | 8     | b. Detailed enlarged section of RCC column and footing with plinth filling.   |         |
|     |          | Week 3 | 18    | c. Detailed enlarged section of RCC Beam, Lintel and Chajjas.   |         |
|     |          | Week 4 | 22,25 | Draw the above-mentioned drawing at serial number 5 using CAD software and enclose the printout.<br>a. Developed plan   |         |
|     |          | Week 5 | 29    | b. Elevation.   |         |
| 5   | May      | Week 1 | 2     | c. Section passing through Staircase, W.C. and Bath<br>d. Foundation plan.  |         |
|     |          | Week 2 | 6     | House Test  |         |

|  |        |       |  |  |
|--|--------|-------|--|--|
|  | Week 3 | 13,16 | Site plan (1:200), area statement, Schedule of openings and construction |  |
|  | Week 4 | 20,23 | Reperform  |  |
